

Why Vulcher 2 the Safety Mulcher, and why Now??

Reasons for

Make mower more versatile

Make mower safer

Make mower greener

Make mower more efficient

Get ahead of the competition

Sell more mowers

Reasons against

Un-aware of product

Pride

Customers Want and Need it!

At this time the Vulcher 2 the Safety Mulcher can be best described as a win- win for everyone. It will help sales, putting you ahead of the competition by separating you from everyone else. It will also help cutters in the same way. Vulcher 2 The Safety Mulcher will also let everyone be a little more green and help our carbon foot print at a nominal cost, less than we pay for the taxes on most machines.

This is advanced technology that can be applied and installed on most cutter decks with very little effort and at an extremely affordable cost. This technology has been eighteen years under development; it enhances the laws of physics that allow the cutting deck to cut more efficiently while allowing the mower to become more versatile.

Why not take a moment to consider the advantages, then take the next step and contact us to see what a nice fit we could be with your mower.
